

UNITED STATES PATENT AND TRADEMARK OFFICE
CERTIFICATE OF CORRECTION

PATENT NO. : 7,261,863 B2
APPLICATION NO. : 09/778192
DATED : August 28, 2007
INVENTOR(S) : Adams et al.

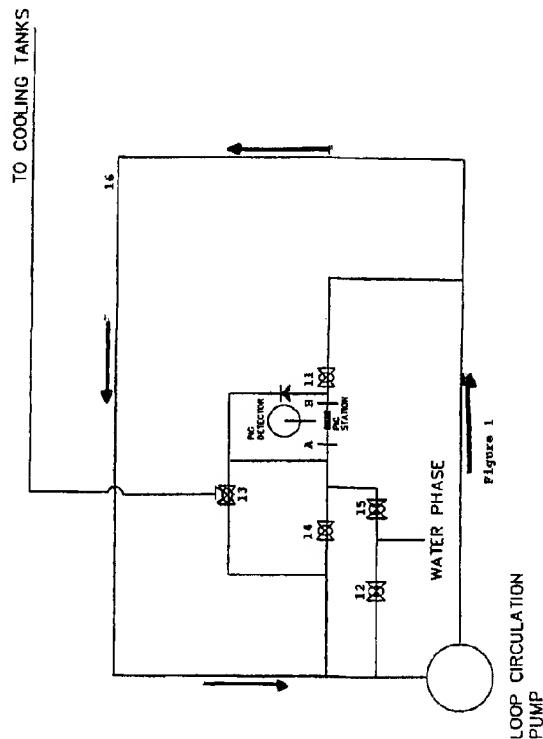

Page 1 of 3

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Delete the title page and substitute therefore the attached title page consisting of corrected illustrative figure.

Drawings:

Sheet 1 of 2, the direction of the arrow should be reversed as shown on the Certificate of Correction.

This certificate supersedes the Certificate of Correction issued July 6, 2010.

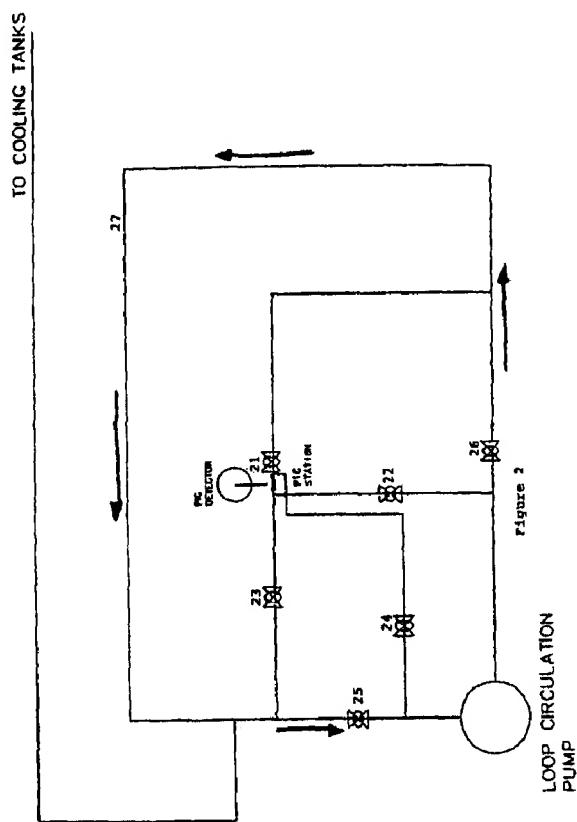

Signed and Sealed this

Third Day of August, 2010

David J. Kappos

David J. Kappos
Director of the United States Patent and Trademark Office

(57) **ABSTRACT**

A closed loop continuous emulsion polymerization apparatus at least comprising a circulation pump, a reactor tube which connects the outlet of the circulation pump to its inlet, at least one feed for supplying raw materials, an outlet, and means for cooling the tube, characterized in that the reactor further comprises an additional tube for by-passing a pig around the circulation pump, a pig receiving station which is in parallel connection with the circulation pump or the reactor tube, and optionally means for directing a pig into the pig receiving station. The invention allows simple removal of the pig from the reactor, affords great freedom in selecting the type of circulation pump and material and shape of the pig, and enables total control over the launching of the pig substantially independent of the reaction medium flow.
